Timber Types and Timber Stains

Timber Types

We offer different timber types for our windows: Spruce, Pine, Larch, Oak

All timbers are grown, harvested and processed near the window manufacturing company. Döpfner is part of the "HOLZ-VON-HIER" (Timber from here) environmental label which guarantees that the timber comes 100% from sustainable forestry.

Spruce and Pine are available at the base price. Larch and Oak have surcharges of approx. 25%-35%.

Timbers Stains

We offer a large range of stains for all timber type. The timber grain is still visible with all these stains which gives the window a warm timber feel, independent of the colour.

Below you can see the full range of stains with Spruce timber:

The same range is available for Larch and Oak timbers.

If you don't want to see the timber grain, it is also possible to paint the timber in a solid colour.

We advise to choose colours and stains based on the actual product which can be experienced in our showroom in Canberra.
